SPECIAL NEEDS

Please only apply if you are really interested in adopting a special needs baby…

MEET CROSBY….a precious, tricolor, 13 lb, apx 9 yr old, Shih Tzu mix (with a docked tail). Can you believe that someone in Moreno Valley just opened their car door, dumped this blind baby in the middle of the street, on the hot pavement and never looked back?? Fortunately, a good Samaritan saw him, scooped him up (not knowing he was dumped) and searched for his family. He was intact, no collar, no chip….nothing. And blind :((Now, he has been fixed, has his shots and he is feeling better every day. He also had a bad ear infection, which we thought was causing him vertigo…but it ended up that he has some neurological issues and does circle a couple times a day. HE LOVES SQUEAKY TOYS!! He gets along great with cats and other dogs. While he probably wouldn't be the right fit for kids, he could go into almost any home who wants a loverboy. Crosby is a cuddler. He is just learning what a belly rub is! Sometimes, he will give a low, deep, growl when he is loving the attention! He loves to go for lazy/slow walks. He is very smart and may see shadows because he does his best (on leash) to walk up/down stairs. Very food motivated. He does his business outside (most of the time) – a yard would help with his potty training). He just wants to be your baby. We are treating him with CBD oil and are hoping we can solve his circling issue. Probably is genetic. Anyway…. Kisses are coming! These dogs live long lives, and Crosby is just beginning his second chapter! If you need a companion as much as Crosby does…come and meet him!
