# Frasier & Niles

**Breed: Lhasa Terrier ??**

**Age: 4-5 yr old brothers**

**Sex: Male**

**Weight: 17 and 14 lbs respectively**

**MEET THE BROTHERS, Frasier and Niles! Two cuter, more bonded brothers, you will not find!**

**Frasier, the bigger of the two, is 17 lbs, gray/white, 4-5 yrs old; Niles is 14 lbs, gray/white, 4-5 yrs old…and the breed? Maybe Lhasa Terrier, they can be whatever breed you want them to be! We never saw them with hair, so we don't really know what breed they are except a very cute one!**

**The boys are very bonded and MUST go as a pair. They clean each**

**other, kiss each other (a lot), play wrestle and are a joy. They do bark when they are playing (Niles more than Frasier), but they settle down. When they arrived, they didn't seem potty trained at all…but they are getting better with outside access. They will still need a refresher course, as they "do what boy dogs do!!" Because they bark when they play, and learning to do their business outside, we believe they would be more successful in a home with a yard vs. an apartment. They are wonderful with other dogs, they love to meet people on their walks and they are very sweet and friendly with everyone. They would be fine with kids over 10 yrs old….they are so rambunctious when they play, and play bite, younger kids may be intimidated! If you have high blood pressure, they will definitely keep a smile on your face and youth in your heart. Just watch the video above. Are you ready for happiness overload?**
