

# Freddy

**Breed:** Lhasa Tzu

**Age:** 10-12 yrs young

**Sex:** Male

**Weight:** 17 lbs

**MEET FREDDY...and he'd be a Mercury before a Kruger! This precious, 10-12 yr old, cream/tan, 17 lb, Lhasa Tzu, was found in the San Bernardino Shelter matted to the bone. He could hardly walk. Once all the hair was shaved, we found a few papilloma, which are benign warts. Unlike human papilloma, they never progress to cancer in canines. They were all removed and he's all good! Freddy is sight challenged; blind in his left eye and sees shadows in his right. That being said...he gets around great; we did bloodwork on him and he's in excellent health! Oh...and he LOVES to give kisses!! All this boy really wants is to be loved, pet, rubbed and loved some more. He is actually potty trained (but we never guarantee) and he does not lift his leg...EVER! He doesn't like to be alone, so he would**

probably love to be with another mature dog as a companion and, especially, you! These dogs live long lives and Freddy really deserves to be loved thru his golden years. He would be perfect for a healthy senior home...he is a great companion. Could you love this older gentleman? He will give you love back 10x over!
