

# Harley

**Breed: Lhasa Mix**

**Age: 2-3 yrs**

**Sex: Male**

**Weight: 16 lbs**

**MEET HARLEY...and ruff and tumble, ready for prime time, rock'n roller, who is ready to get on his bike and jam!!! Harley is a**

very playful 2-3 yr old, creamy white, 16 lb Lhasa Maltese? He came from Lancaster Shelter and was briefly exposed to parvo; fortunately, never got it. We have had to wait to neuter him, so he won't be available until after June 30, but he will be at adoptions on June 28. Once again, with all the unaltered animals around, we are seeing mixes we have no clue what they are!

What we know about Harley is he doesn't have a mean bone in his body. He might get a little protective when he sees other dogs or people, but only a gentle sniff and introduction and he's everyone's BFF! When Harley greets you in the morning, he can almost bowl you over with active jumps and kisses and "thanks for being my family" first thing in the morning! He's a great eater and is more than excited to take his walk, then eat, then play, then cuddle and start all over again! He's been great in the potty training department - he waits until you walk him to do his business! He will even sometimes do #2 on command - or maybe that's just a coincidence? Whatever, he's regular and consistent and a pleasure to walk.

We believe Harley would be best suited in an active family, with kids over 8 yrs old and at least one other dog! He would not thrive in a senior home. If you don't have another dog, and you have the time and patience for a very playful pup who needs to learn what to do with toys - and how to play and fetch like a gentleman - then Harley's your guy. One thing - Harley will go into nirvana if you rub his belly while he is cuddling with you one the couch! We can only speak the very highest of this wonderful pup...and he's quiet!!
