Luna

Breed: Shih Tzu X

Age: 4 yrs (DOB 4th of July, 2022)

Sex: Female

Weight: 12 lbs

*****ADOPTION PENDING*****

MEET LUNA….a precious, special needs 4yr old, tan-with-black-tips, 12 lb Shih Tzu mix, who sadly had to be given up for financial reasons.

When Luna was brought into this world she was very loved by her family. She was an adorable, normal, healthy, puppy, whom they treasured. Unfortunately, unforeseen medical maladies, and a horrible economy, has forced them to make the difficult decision to relinquish Luna to us for rehoming. They just were unable to handle normal vetting costs and they wanted her to have the life she deserves.

Despite her challenges, Luna is a pip!! She has IVDD, a disc disease that is under control, but we are investigating treatment possibilities. She is not paralyzed (please watch her video!), she gets along great with her wheels and she can potty on her own!! She also had pyometra (an often deadly uterine infection) and immediately underwent surgery and has recovered nicely. She is a young, otherwise healthy adult pup who is a sweetheart, a joy to be around, gives kisses and looks at you with those big brown eyes and you can't say no to her no matter what! She is fine with other dogs but really becomes attached to her humans and demonstrates what real love is.

The ideal home for Luna will definitely have a yard and time to give her the attention she deserves. She practically flies with her wheels and loves her walks! Luna may have special needs…but she is special indeed and deserves the best life ever. Can you give it to her? She won't cause any trouble, she promises!
