**Age: 4.5 yrs old**

**Sex: Pair (one male, one female)**

**Weight: 23 and 14.5 lbs (respectively)**

**\*\*\*ADOPTION PENDING\*\*\***

**MEET MILO AND LULU...an adorable, "very healthy!" tan/white, 4 yr old, 23 lb and 14.5 lb bonded pair of Shih Tzu, who originally came from a breeder. Poor babies had been surviving on bread crumbs and who knows what else ☹ Seems this caused them to get a bit overweight!! More of them to love!! They have been together since birth and CAN NOT BE SPLIT UP. Their previous dad, who loved them with all his heart, had to give them up because he recently lost everything, including his mind! Business burned, wife died and the pups have been his life and so they were very well cared for. Unfortunately, his health has declined and they were all homeless and living in a barn. Out**

of pure love, he has given them up for a better life.

Milo and Lulu are so sweet, but still a little confused. They are now getting used to dog food! Well, Milo will eat anything! They LOVE to go for walks, although Milo is a bit on the chunky side so he is still building up his endurance! They are pretty quiet, until you try to go to bed without them! If you are not willing to let these two sleep in bed with you, these are not the pair for you!! Lulu will bark to tell you to come back and get them! They get very excited when you come to play with them and Milo loves the sound of squeaky toys – but not really sure what to do with them! Previous owner says they were potty trained and they seem to be good but no promises. They will use PP pads if they can't get out. They like everyone...kids, dogs, cats AND bunnies! They do NOT like being alone without a human. And, they do NOT like being separated at all!

They are still settling in, but they are really very well adjusted and do understand some commands. We are sure, as time goes on and they get more comfortable and mesh well into the family. If you are looking for some cuddly furchildren...look no further! They are ready to go!!
