

Pearl

Breed: Maltese

Age: 12 yrs young

Sex: Female

Weight: 5 lbs (underweight)

MEET OUR PEARL GIRL...a tiny 5 lb, 12-13 yrs young, white Maltese, who was stranded at the West Valley Shelter, skin and bones, longing to get out. She had a mouth that desperately needed a dental, with a few broken, dirty teeth, but she only needed four pulled! Maltese usually have awful teeth, but she still has most of hers!! Bloodwork came out just fine. Pearl's eyes are a little pigmented, but she still sees fine ...just like looking thru dirty glasses! She is a sweet, sweet girl, who likes to tool around the house, goes up and down the stairs, loves her little strolls outside (where she does her business) and happily lives her life! It is adorable to watch her scamper around, especially when she wants to go out or have breakfast! She eats very well, but she is underweight and needs lots of

goodies! Pearl is very dainty...but she can also be feisty when you are doing something she doesn't like! This little lady really needs a home to live out her platinum years. These little ones live long lives. She is healthy as far as we have discovered...just needs to be fattened up! Would you like to spoil this little girl and watch her bloom? A senior, but fairly active home, where she will be walked and loved, would be fine...she is an angel and deserves to be loved. She would also be good with a family who just want a little one to care for ☐
