

Watson

Breed: Lhasa Tzu

Age: 1.5-2 yrs

Sex: Male

Weight: 14 lbs

THIS IS WATSON...formerly listed as a pair with his brother, Sherlock! He is a gold/white, 14 lb, 1.5-2 yr old, Lhasa Tzu, who is an interesting little fella! We think he and his brother have a love/hate relationship...so we separated them. They came from the East Valley Shelter and we thought they needed to be with each other, but as much as they love each other, they argue a lot! Watson is very expressive with his body language and it was clear that they were more in competition with each other! They loved to "bump butts" to show their dominance! Watson is a bit alpha, but he is good with other dogs... especially big, fluffy dogs! He loves playing with his foster buddy, who is 75 lbs! He is a character, especially when he sees himself in a reflection and starts to bark! He will whine if you leave him

alone or separate him from whomever he is bonded to, but he does settle down. Time and training will be the key to this boy's happiness. He needs both human and canine companionship...could go as an only dog IF a human is there to help make him feel secure. We believe that the boys were left outside without a lot of love and attention...Watson is very kissy and affectionate and loves to explore the outside world. He loves his walks and cuddle time. He will need training but he is smart and wants to please. Loves toys, is good in the car, on walks and will bond to a canine who accepts him in the house. Does this sound like a boy you could love? We do!!!
